Gregory R. Piche' : Sham Peer Review: The Power of Immunity and The Abuse of Trust (Volume 1) before purchasing it in order to gage whether or not it would be worth my time, and all praised Sham Peer Review: The Power of Immunity and The Abuse of Trust (Volume 1):

0 of 0 people found the following review helpful. Simple to read expose of legal blindsiding of doctors which ...By CustomerSimple to read expose of legal blindsiding of doctors which is unbelievable. Doctors are so helplessly

exposed to the vagaries of hospital politics and inaccurate public reporting of the nature of guilty forever regardless of innocence without reasonable ability to vindicate themselves, all in the name of protecting the public. There is unfortunately a sense of bias in the way it's written and it would be very helpful to have some kind of fact checking reviews, but even given that it reveals a side of medical legalities that are unacceptable to physicians. Malpractice suits are the least of a doctor's fears. Real peer review and quality review is a must.

In attorney and medical advocate Gregory Piche's hard-hitting book SHAM PEER REVIEW: The Power of Immunity and The Abuse of Trust, the author highlights several cautionary legal cases stemming from the Peer Review process, more appropriately known amongst medical professionals as The Sham Peer Review. SHAM PEER REVIEW is an illuminating read highlighting professional medical careers held in the balance from unjust and unfair evaluations of personal performance. The book also delves into our judicial system's fragile unwillingness and maze of interpretations in confronting and challenging the hornet's nest created by Sham Peer Reviews. Every hospital as an institution has a power structure among its medical staff. Powerful members of a medical staff are never the subject of Sham Peer Review and rarely the subject of any kind of meaningful Peer Review. Armed with control over the Peer Review process, statutory immunity and other protections, medical staff leaders wield an immense amount of personal power over those on the medical staff that they view as threats, competitors, or of a lesser station.
