Mary Kilbourne Matossian : Shaping World History (Sources Studies in World History) before purchasing it in order to gage whether or not it would be worth my time, and all praised Shaping World History (Sources Studies in World History):

0 of 4 people found the following review helpful. Informative but BoringBy A CustomerThis book gives a clear and informative approach to how society and the world has developed through breakthroughs in ecology, technology, science, and politics. It is an easy but boring read.

This innovative survey of world history from earliest times to the present focuses on the role of four factors in the development of humankind: climate, communication and transportation technology, scientific advances, and the competence of political elites. Matossian moves chronologically through fifteen historic periods showing how one or more of the causative factors led to significant breakthroughs in human history. *Shaping World History* is based on original research and also draws widely from the literature on the history of science, technology, climate, agriculture, and historical epidemiology. This compelling analysis is presented in a personal style and includes reflections on how things work and why they are important.
