Mark A. Lemley, Peter S. Menell, Robert P. Merges : Software and Internet Law (Casebook) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Software and Internet Law (Casebook):

4 of 4 people found the following review helpful. Great for people who are interested in software licensing!! By AUNYA SINGSANGOB The book contains many useful and comprehensive information about software and the Internet law in various aspects. I can say that, comparing with other similar law books I have read, this book does provide most cutting-edge issues, specifically software licensing.

SOFTWARE AND INTERNET LAW, Third Edition, is an excellent choice for courses that cover all aspects of computer law. This careful exploration of computer software, the Internet, and e-commerce focuses on intellectual property, licensing, and antitrust law to give students a solid introduction to the full range of the field. This proven teaching tool: provides a combination of original text, significant cases, challenging problems, and exemplary questions along with the authors insight from their cumulative experience illuminates the many roles of lawyers who service the software industry and the Internet supplies broad coverage, from commercial issues to constitutional issues such as free speech is written by authors who are leaders in the field, well known for their scholarship reviews technical terms for the novice is accompanied by a useful Teachers Manual with sample syllabi, exam questions, course suggestions, and answers to all the problems in the text The authors incorporate much new material in the Third Edition: extensive updating of the Internet chapters substantial expansion of the discussion of the legal issues surrounding open source additional discussions of the problems of spyware, malware, and computer and data security

new material on the enforcement of clickwrap and on browsewrap licenses updated treatment of digital copyright, including the Supreme Courts decision in *MGM v. Grokster* more attention paid to the important new issue of Internet keywords in trademark law
