**Eric Sutton : Software Patents: A Practical Perspective** before purchasing it in order to gage whether or not it would be worth my time, and all praised Software Patents: A Practical Perspective:

0 of 0 people found the following review helpful. Very useful and easy-to-follow bookBy Kate GaudryThis book does a terrific job of covering important and representative cases pertaining to software patenting. For some cases, the author selects just a few sentences or paragraphs to emphasize an important point. Longer extracts are provided for other more consequential cases.In addition to using cases to educate the reader, summaries of important topics are frequently provided. The book also details practical strategies, such as a simpler way to think of the current patent-eligibility test and "patent profanity" listings that identify terms to be avoided.Highly recommended for anyone

interested and/or involved in software patenting.0 of 0 people found the following review helpful. This book exhaustively lists the relevant case law in its current state and does a great job pulling it all together in a very sBy Tom FranklinMr. Sutton is a master at his craft. He has a command of the law few can come close to. This book exhaustively lists the relevant case law in its current state and does a great job pulling it all together in a very simplified manner. Anyone trying to master the difficult craft of software patents must buy a copy of this.0 of 0 people found the following review helpful. Great book!By Lynn WGreat book! It is very helpful for patent attorneys who draft software patents.

Software Patents: A Practical Perspective is a concise explanation of software patent law with an emphasis on recent developments in the courts and at the patent office. The book is intended to help law students and patent attorneys quickly catch up on these recent developments. The book may also be helpful for engineers who already have some familiarity with patents.

About the AuthorEric Sutton is a registered patent attorney who manages the Java, Internet of Things, PeopleSoft, Enterprise Manager, BlueKai, Responsys, Datalogix, Eloqua, BigMachines, and Social Relationship Management patent portfolios as Senior Patent Counsel at Oracle in Redwood Shores, California. At Oracle, Eric also runs an inter-company patent quality study, which recently culminated in submissions to the USPTO as part of the Enhanced Patent Quality Initiative and an article published on IP Watchdog. Since 2012, Eric has also served as Adjunct Professor at Chicago-Kent College of Law, where he currently teaches Software Patents: A Practical Perspective. In addition to teaching his course in Chicago, Eric regularly presents on patent quality, efficient patent prosecution, portfolio management, and Alice-related topics. Earlier in his career, Eric served on the front lines as a patent prosecutor at Hickman Palermo in San Jose, California, and as a law clerk at Singleton Law Firm in Champaign, Illinois. Eric received a Certificate in Intellectual Property when he graduated from The John Marshall Law School in Chicago, Illinois, in 2008. Eric is also grateful for his software development experience at the National Center for Supercomputing Applications, his undergraduate roots at the University of Illinois at Urbana-Champaign, and even his high school roots at the Illinois Mathematics and Science Academy.
