yet practical way. Benikov shares first-hand knowledge of common mistakes and pitfalls for young lawyers, as well as many unique how-tos and valuable lessons learned. By sharing his personal knowledge and experiences as a new attorney navigating the rough waters of starting a solo practice, Professor Benikov gives practical and to-the-point advice. From choosing an office and finding a mentor, to helpful tips on managing your reputation and money, Professor Benikov's book is both an insider's guide for the newly-minted lawyer, and the story of an extremely hard-working man sharing his model of success for the benefit of the new lawyer.

This book contains valuable information to be a lawyer and to survive the hard society when you started the career. If you are looking forward on how much a lawyer would make in a year; or to find fancy experience for lawyers, this book may not fit your dream. What the book tells are solid truth and real experience of a person who had practiced though and be willing to share the detail of law. As an ongoing law student, this book really shows useful tips on my future practice. Yes it may be too short, but that is how this book will become my pocket tool book :)

By DerSiegler
What else would you want in a book? The author is honest and forthright about his experiences and writes with the reader in mind; a reader who may be contemplating her own law office... and if not her own law office, then at least the "hustle" required to be a successful attorney. All of the elements are relevant: Quality of Life, Making Money, Client Interactions and the importance of getting a Mentor. This book is good and it is useful.

Four years ago, Mr. Benikov was loading bread trucks in a bakery in South Phoenix. Today, Mr. Benikov owns his own successful criminal defense practice and is a law professor. When Mr. Benikov started his own practice and left the bakery, he literally didn't know where the courthouse was. This book is about how his law practice was started and built and how other young attorneys can start their own practice. Mr. Benikov wanted to write a book that not only dealt with starting a law practice but how to go about developing a professional reputation. Any young attorney who has any interest in ever having their own practice or improving their professional reputation will find this book useful.
