**From United Nations : State Of The World's Children: 2014 In Numbers: Every Child Counts - Revealing Disparities, Advancing Childrens Rights** before purchasing it in order to gage whether or not it would be worth my time, and all praised State Of The World's Children: 2014 In Numbers: Every Child Counts - Revealing Disparities, Advancing Childrens Rights:

This special edition of The State of the Worlds Children will highlight the critical role data and monitoring play in realizing childrens rights. With reliable data, analyzed and disseminated effectively, monitoring makes it impossible for the denial of rights to go unnoticed. Data do not, of themselves, change the world. They make change possible by identifying needs, supporting advocacy, gauging progress and holding duty-bearers to account. Making the possible real is up to decision-makers. The essay also calls for greater investment both in disaggregated data and data on previously uncounted children so that efforts and initiatives may be better targeted to reach the most excluded. Contains an essay (4,500 words), 14 statistical tables, graphics and photos.
