The Law School Legends series CDs are better with more dynamic speakers but they have limited options. This covers several areas not found in that series (like trademark, trade secrets, and patents). 0 of 5 people found the following review helpful. Great overview of Intellectual Property By Izzy A great way to prepare for your exam! Relevant information in a concise format. 4 of 5 people found the following review helpful. Excellent material - decent "entertain level" By T. Sen I've listened to about 10 audio CD's for law school courses. Either the speaker is absolutely dry as hell (to the point where the CD's should be outlawed in the car for risk of falling asleep at the wheel) or the material covered is extremely sparse, out of date, or outright wrong. This is one of the best. Covers the most important topics, is presented logically, he goes into some interesting cases. The best is that the CD's are very well indexed, so you can easily jump to a section. (Unlike other CD's which are one friggin track, so you have to listen to the whole CD straight through.)

This audio lecture presents the essentials of intellectual property law in a clear, succinct, time-saving format. It includes informed exam tips to maximize performance.
