SystemBy BookmanThis book is a must read for not only victims of the family courts (both 'Winners and Losers') but also anyone living in this great country of ours. It describes, in rational, well-thought out, objective terms a government controlled and funded 'system' which rapes good and loving parents both emotionally and financially. Baskerville does this with a significant flair for literature and more importantly with complete backing of research and prior studies all of which are appropriately foot-noted.This country, and many which are based on our system, need this book, need the right people exposed to this book and need it badly. The government has basically taken on the role of patriarch and done so to the exclusion of loving parents - this has had disastrous results and if not stopped by our immediate actions will have even more disastrous results in the not so distant future.Even if you have an intact family - Baskerville makes it clear that you are largely fooled (or perhaps brainwashed) that this family is actually yours, because lurking just behind the governmental guise of 'the best interest' the government is waiting to swoop down, take your children and your money and do with them whatever they see fit. It sounds like paranoia, but please be aware, this is happening on a daily basis in this country - go sit in on a family court for a full day - you will leave shocked and dismayed that we call these procedures 'court-room justice.' All the government needs is a little catalyst - someone just needs to say 'no-fault divorce.'Buy this book! Read it thoroughly and pass the word on.0 of 0 people found the following review helpful. 'Taken into Custody' exposes the greatest and most destructive civil rights abuse in America today. Family courts and Soviet-style bureaucracies trample basic civil liberties, entering homes uninvited and taking away people's children at will, then throwing the parents into jail without any form of due process, much less a trial. No parent, no child, no family in America is safe. The legal industry does not want you to hear this story. Radical feminists, bar associations, and social work bureaucracies have colluded to suppress this information. Even pro-family"" groups and civil libertarians look the other way. Yet it is a reality for tens of millions of Americans who are our neighbors.
