**Laurent Garzaniti : Telecommunications, Broadcasting and the Internet: EC Competition Law and Regulation**  
before purchasing it in order to gage whether or not it would be worth my time, and all praised Telecommunications,  
Broadcasting and the Internet: EC Competition Law and Regulation:

Given the fundamental changes in the EC telecommunications regulatory regime, as well as the growing case law in this area, the new edition of this best-selling book provides a necessary update for all practitioners. The new regulatory framework for electronic communications entered into force in 2003. This applies to all electronic communications, including broadcasting, satellite, cable and the Internet. The book explains the details of the new provisions and includes developing case law relating to competition in these converging sectors. It is in two main sections: regulatory issues, and the application of EC competition rules to telecoms, broadcasting and the Internet.\* Comprehensive - and written in a clear, objective and practical manner\* A necessary update to a key work in this complex and fast-moving field\* Provides full explanation of the new telecoms regulatory framework

...an indispensable practitioner text. A fully referenced explanation of the law in the topics covered by the title. A fully

referenced explanation of the law in the topics covered by the title. The only comment we would make is on the impossibility of keeping such a book up to date and so it does not appear to us in the Internet age that a bound book is appropriate. Nevertheless you will find the answer as to what the law was at January 1, 2000 in this book. Communications Law, 2000 - of previous edition.
