Text describes a successful program tackling child labor issues, implemented by the author in Andhra Pradesh, India.

Identifies four factors leading to the success of the program and presents a cost-effective, practical and viable model for addressing child labor. For those in the field of education, sociology, and public administration. Softcover, hardcover available.

This is an inspiring, humbling account of what can be done with vision backed by infinite determination. And though the book tells of a relatively small success, affecting a few thousand children in one district, it's also a handbook for others to follow, as well as a wake-up call for governments and individuals across the world' - Gerald Haigh, Times Educational Supplement `This is an inspiring, humbling account of what can be done with vision backed by infinite determination.
