Regulatory Framework for Electronic Communications Handbook 2010 Edition:

In the 27 EU Member States, regulation of electronic communications is increasingly driven by European legislation. This book is a collection of key European legislation and other instruments pertinent to the electronic communications sector, with, in some cases, annotations by author Michael Ryan and his colleagues. The book includes a raft of new legislation that is currently before the EU parliament which should be adopted early in 2010.

About the Author Michael Ryan, head of Arnold Porter LLP's telecommunications group in London, has over 25 years of experience in the industry. He advises UK and international telecommunications operators, service providers and Internet service providers on regulatory and commercial issues. He is frequently consulted by regulatory authorities and financial institutions on regulatory issues affecting the telecommunications sector.
