Agreements) (v. 1):

This volume examines the General Agreement on Tariffs and Trade. It explains the amount of sovereignty that nations lose by joining the World Trade Organization and gains that ensue from the resulting cooperation. The policy aspects of the interface between national regulatory interventions and international disciplines are explored.

"An essential and very refreshing contribution to contemporary international trade literature. It adds a depth and perspective that are of primary importance to the very understanding of the WTO order. An excellent publication that combines a first-rate academic analysis with a very clear and detailed examination of the practice of international trade." Dan Horowitz, Chair, Trade Customs Law Committee, IBA International Trade Law and Regulation Journal.
