From Palgrave Macmillan : The Geography of Environmental Crime: Conservation, Wildlife Crime and Environmental Activism (Palgrave Studies in Green Criminology) before purchasing it in order to gage whether or not it would be worth my time, and all praised The Geography of Environmental Crime: Conservation, Wildlife

Crime and Environmental Activism (Palgrave Studies in Green Criminology):

This book critically examines both theory and practice around conservation crimes. It engages with the full complexity of environmental crimes and different responses to them, including: poaching, conservation as a response to wildlife crime, forest degradation, environmental activism, and the application of scientific and situational crime prevention techniques as preventative tools to deal with green crime.

This book is part of the Palgrave Studies in Green Criminology series. The book contains three parts and consists of nine chapters. This book will serve best as a reference and source for those immersed in the academic field of green criminology. Summing Up: Recommended. (J. Organ, Choice, Vol. 54 (6), February, 2017) This is a genuinely original collection, full of fresh perspectives and new data on a range of topics - from conservation through activism to environmental crime prevention. Interdisciplinary and international it highlights the continuing growth of excellent scholarship in green criminology. (Nigel South, Professor of Sociology, University of Essex, UK)From the Back CoverThis book critically examines both theory and practice around conservation crimes. It engages with the full complexity of environmental crimes and different responses to them, including: poaching, conservation as a response to wildlife crime, forest degradation, environmental activism, and the application of scientific and situational crime prevention techniques as preventative tools to deal with green crime.
