Joseph Zimmerman : The Government and Politics of New York State before purchasing it in order to gage whether or not it would be worth my time, and all praised The Government and Politics of New York State:

0 of 2 people found the following review helpful. Bad valueBy BrielleNo reslae value1 of 4 people found the following review helpful. Zimmerman's bookBy David W. CoveyOf the three text books used for this course in New York Politics, Zimmerman's seems the most dated and not as easy to read as the others.

Since the mid-19th century, American law has recognized adoption as a way to create parent-child relationships. As the product of law, rather than blood, adoptive families have become a focal point for debates about the meaning of family, the rights and responsibilities of parents, and the best interests of children. Families by Law brings together diverse perspectives on contemporary aspects of adoption law and practice. Following a historical overview of adoption in American law and society, the reader presents different responses to concerns about who may place children for adoption, the status of birth parents, who may adopt, and the legal and psychosocial consequences of adoption. The new frontiers of adoption are explored: from transracial and intercountry adoption, adoption by same sex couples, and the adoption of children with special needs, to the movements for opening records and maintaining post-adoption contact between adoptive and birth families. The relationship between adoption and assisted reproductive technologies is discussed, as are feminist, economic, and philosophical perspectives on adoption and procreation. The volume includes statutes and cases, advocacy organization statements, and pieces from legal scholars,

social scientists, philosophers, psychologists, and sociologists in order to provide a wealth of information about the contemporary dimensions of adoption. Families by Law provides undergraduates, as well as law, social welfare, and public policy graduate students and others interested in family relationships with a multifaceted context for understanding the complexities of contemporary family life.

"This source book expresses Cahn and Hollinger's keen understanding of adoption law, combining classic articles, new material, and penetrating commentary on every critical and controversial dimension of adoption. Those fortunate enough to read this book from cover to cover will vastly expand their appreciation for adoption issues."-Richard P. Barth, Frank A. Daniels Distinguished Professor, University of North Carolina at Chapel Hill "An outstanding collection, offering in-depth coverage of all the crucial and current issues in adoption law and practice. Families by Law is both a wonderful supplement to a traditional family law course or stand on its own as the perfect text for studying adoption in the United States today. I am thrilled to have this resource now available to those who teach or think about adoption."-Carol Sanger, Columbia Law School "A strong argument."--"The Law and Politics Book ""Cahn and Hollinger have covered diverse topics - from foster care, to attachment, to racial and ethnic identity in transracial adoption, to legal issues in gay and lesbian adoptions."-"Adoptive Families", "The essays encompass the main controversies in the field, placing them in their historical and social contexts. The book will be very useful for courses focusing on this issue, and will serve researchers in welfare history, public policy, legal history, family history, and history of childhood."-"CHOICE""A collection that will interest and assist psychologists who work with the wide range of children included in this book. I learned a good deal in my reading of these articles and find it easy to recommend the book to any psychologist whose clinical practice, research, or teaching includes consideration of parent-child relationships, adoption, foster care, child custody, and the significance of family for individual development and social cohesion. . . . Wide-ranging and provocative in its approach to the issue addressed."-"The American Psychological Association", From the Back Cover In this updated edition of his classic text, Joseph F. Zimmerman offers a balanced presentation of the institutions and political processes of the Empire State. He begins with an overview of the state and offers chapters on federal-state and interstate relations; state-local relations; the constitution; political parties, elections, and interest groups; the state legislature; the governor; the "fourth branch" (the departments and agencies of the executive branch); the judiciary; and state finance, including state-local fiscal relations. Zimmerman emphasizes the legal foundations of the state as they influence greatly the behavior of leading public officers and interest groups. Most importantly, constitutional restrictions on the state legislature and local governments are examined, as well as the ingenious ways by which several restrictions upon the state legislature have been circumvented. "Within the American system of government, the states play an extremely important role. For that reason, I think that residents of all states have a need to become as well informed as possible about the structure and workings of their state governments, and about the political forces that influence the workings of their state governments. This comprehensive and informative survey of New York State government and politics will fill that need and also serve as an excellent text for college courses." -- Frank J. Mauro, Rockefeller College of Public Affairs and Policy and Executive Director of the Fiscal Policy Institute About the Author Graduate School of Public Affairs of the State University of New York Naomi Cahn is John Theodore Fey Research Professor of Law at George Washington University Law School. Her previous books include *Red Families v. Blue Families*, *Test Tube Families* (NYU Press 2009), *Families By Law: An Adoption Reader* (NYU Press 2004), and *Confinements: Fertility and Infertility in Contemporary Culture*. Joan Heifetz Hollinger is a professor at the University of California, Berkeley, where she teaches courses in child welfare law and policy and sex, reproduction, and family law at the Boalt Hall Law School and in the Legal Studies Program.
