From Zielinski Chris Duquenoy Penny Kimppa Kai : The Information Society: Emerging Landscapes: IFIP International Conference on Landscapes of ICT and Social Accountability, Turku, Finland, June ... in Information and Communication Technology) before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Information Society: Emerging Landscapes: IFIP International Conference on Landscapes of ICT and Social Accountability, Turku, Finland, June ... in Information and Communication Technology):

This book is compiled of selected proceedings from the "Landscapes" Conference held at Turku University, Finland, in July 2005. The themes chosen for the conference philosophy, ethics and sociological aspects, culture and education; social aspects; politics and regulation; economics and work; technology and emerging technologies represent many of the perspectives from which to view this landscape. The papers illustrate the diverse impacts of the information society and the changing paradigms within education, law, health care, the workplace and on future societal infrastructures through research initiatives and the development of new technologies. In this book, IFIP WG9.2 has attempted to capture the new emerging landscape of the Information Society. A picture of profound technological and social change emerges from this holistic approach. It offers a key to understanding the ramifications of computer technologies within the information society, and of the social accountability of all those who work with and are affected by them.

From the reviews: "The papers presented in the book reflect the impact that new technology and research are having on education, law, health care, the workplace, and social networks. Thus, this collection concerning information and communication technology (ICT) is probably most useful for the reader . includes an extensive list of references at the end. Each paper also has information concerning the author or authors, and begins with an abstract. Many papers contain figures and charts. It is worthwhile as a stimulant to thought ." (Brad Reid, Computing s, July, 2006)From the Back CoverInternational Federation for Information Processing The IFIP series publishes state-of-the-art results in the sciences and technologies of information and communication. The scope of the series includes: foundations of computer science; software theory and practice; education; computer applications in technology; communication systems; systems modeling and optimization; information systems; computers and society; computer systems technology; security and protection in information processing systems; artificial intelligence; and human-computer interaction. Proceedings and post-proceedings of referred international conferences in computer science and interdisciplinary fields are featured. These results often precede journal publication and represent the most current research. The principal aim of the IFIP series is to encourage education and the dissemination and exchange of information about all aspects of computing. For more information about the 300 other books in the IFIP series, please visit springeronline.com. For more information about IFIP, please visit www.ifip.org.
