James L. Cairns : The Inventor's Complete Handbook: How to Develop, Patent, and Commercialize Your Ideas before purchasing it in order to gage whether or not it would be worth my time, and all praised The Inventor's Complete Handbook: How to Develop, Patent, and Commercialize Your Ideas:

With 50 years of experience as an inventor and well over 60 U.S. patents, Dr. James L. Cairns shares his vast know-how to help you come up with, develop, and benefit from your ideas. You'll learn... The entire inventing process The importance of planning for all contingencies before ever investing capital How to protect your creation by filing a patent All the information about this multi-faceted process, from design patents to international patents, is laid out in an easy-to-follow format rigorously proofed by several lawyers.

In his basic 288 page instruction guide, *The Inventor's Complete Handbook: How to Develop, Patent, and Commercialize Your Ideas*, author James L. Cairns draws upon his more than fifty years of experience and expertise as an inventor and holder of over sixty U.S. patents to provide aspiring inventors to originate, develop and benefit from their ideas. *The Inventor's Complete Handbook* comprehensively covers the entire inventing process starting with a creating and developing a sound idea. *The Inventor's Complete Handbook* then directs the reader through the uses of visualization and the importance of planning for all contingencies before ever investing capital. *The Inventor's Complete Handbook* also shows how to protect the creation of a new invention by filing a patent. All the information about this multifaceted process, from design patents to international patents, is laid out in an easy-to-follow format rigorously proofed by several lawyers. As informed and informative as it is practical and user friendly, *The Inventor's Complete Handbook* is very highly recommended for personal, community, and academic library reference collections. --*The Business Shelf* - Midwest Book About the Author Award winning Physicist/Oceanographer Dr. James L. Cairns is a lifelong inventor with more than 60 issued and pending U.S. Patents. Most of his technical contributions have been components for deep-ocean power and communications networks. They enabled offshore oil and gas operations to move into the very deep sea, greatly expanding the global area accessible for offshore energy production. His systematic approach to inventing, based on over five decades of successful experience, provides a useful and inspiring model for other independent inventors.
