**John Nagle, J. Ruhl, Kalyani Robbins : The Law of Biodiversity and Ecosystem Management (University Casebook Series)** before purchasing it in order to gage whether or not it would be worth my time, and all praised The Law of Biodiversity and Ecosystem Management (University Casebook Series):

The third edition contains an all-new section on the major threats to biodiversity, including several chapters detailing the impact of climate change and the emerging legal and administrative issues that are arising in response to this development. The book further defines biodiversity, outlines factors in choosing among different policy approaches

for its protection. The authors include original notes and questions to stimulate class discussion.
