Stephen McCaffrey : The Law of International Watercourses (Oxford International Law Library) before purchasing it in order to gage whether or not it would be worth my time, and all praised The Law of International Watercourses (Oxford International Law Library):

0 of 0 people found the following review helpful. Five StarsBy Itzhak E. KornfeldExcellent Book from a preeminent expert.0 of 0 people found the following review helpful. Five StarsBy Joaquin Caceres BrunExcellent!0 of 1 people

found the following review helpful. GoodBy Katey BakerjianGot the book on time and received a partial refund because the company let me know there was a little more damage than was advertised, however when I got the book I thought it was fine and didn't have any more damages to it than was stated in the ad. Good experience.

The Law of International Watercourses examines the rules of international law governing the use of international rivers, lakes and groundwater shared by two or more countries. This new edition updates the entire book and adds a new chapter on the law of navigation on international waterways.

s from previous edition: "McCaffrey's book is comprehensive, scholarly and readable. I recommend it not only to scholars but also to practitioners in national water authorities and agencies, and in international consultancies, water companies, and law firms, who will find it an authoritative guide when putting theory into practice." - The Journal of the Chartered Institution of Water and Environmental Management, Vol. 16, No. 3, August 2002 "A very valuable source of knowledge relating to the contemporary law of international watercourses. It is very sound from the scholarly point of view, but at the same time, the author exhibits a realistic approach to the difficult problem of the management of shared freshwater sources. Well structured and very accessible in [its] presentation of issues." - International and Comparative Law Quarterly, Vol. 51, Part 1, January 2002"Every international lawyer should have at least a passing familiarity with the subject. There is perhaps no better place to begin than with The Law of International Watercourses...[an] impressive study...thorough and comprehensive" - Joseph W. Dellapenna, The American Journal of International LawAbout the AuthorStephen McCaffrey is Distinguished Professor and Scholar at the University of the Pacific, McGeorge School of Law in Sacramento, California, USA. He was the Special Rapporteur for the work of the UN International Law Commission on the Law of the Non-Navigational Uses of International Watercourses
