No nonsense reality checkBy HelvisAnyone thinking about law school should own this book and particularly those who haven't firmed up their reasons for applying. Ms. Levine forces the reader to take a realistic look at the stress and grunt work necessary to become a successful attorney. It is my hope that more prospective law students will carefully read this book and make an informed decision. The result will be more students cut out for law school who will excel and have a passion for the field. Far too many lawyers went in chasing prestige and money or they did not know what to do with a social science degree. Ms. Levine, and other straight shooters like her, can hopefully help stem the tide of bitter underemployed lawyers.0 of 0 people found the following review helpful. Great Incite Especially for Current Professionals Seeking a Career ChangeBy CoachThe book gave very good incite for those seeking information on law school and whether or not it would be for them. I am a current working professional and wanted more information on whether or not to pursue a career in law. The book gives you multiple perspectives on the field from a ton of people who are currently in the field of law and even those who left after they realized law wasn't for them which is a plus because most books usually only tell you a one sided perspective which is usually biased. It also brought me some comfort of narrowing down my school selections by breaking down whether it is worth going to a t-14 school or a regional school that may be a tier 1-2. The book also breaks down the different types of law one could study and examples from professionals in that field to give you an honest perspective of what to expect once in that specific concentration of law. I definitely would recommend this book and I plan on reading Ann Levine's "The Law School Admission Game: Play Like an Expert" to get a better incite on which law school to attend and any inside secrets/knowledge that I need to be aware of that can make my process a whole lot easier.1 of 1 people found the following review helpful. The Smartest Purchase I've Made This Year!By J. HeathThis book ranks as one of the smartest purchases I've made this year. Law school is a major investment in time and money and the decision to go should not be undertaken lightly. There are plenty of discussion boards and blogs with conflicting messages about the legal profession, lawyers and law schools. This book is a tremendous help to people considering law school and a legal career. The book is full of information that is hard to find elsewhere and is written without a bias for or against law school. Attorney Levine's book is easy to read and engaging. If you are even remotely considering law school, I wholeheartedly recommend this book.

Whether you're considering law school or are already committed, "The Law School Decision Game: A Playbook for Prospective Lawyers" explains your choice to enter the legal profession with the candor readers have come to expect from Ann Levine's Law School Expert blog including: What lawyers do, how much money they make, and how hard they work. What's important in choosing a law school. What BigLaw is really like. What to consider before taking on student loan debt in today's job market. What you can do now to increase your likelihood of getting hired later. What is important in choosing an area of specialization. What you need to know and do in law school and in the first few years of your career to set yourself up for success. Law school admissions directors are going to hate this book, but it's critical for potential lawyers who wish to make an informed decision about their careers before they spend three long years in law school and potentially a lifetime paying off their debt. I know many miserable law students and even more unhappy lawyers who I am sure wish they had read this book before ever taking the LSAT.
