For neophytes and veterans alike - a great resourceBy Sharon NelsonIf you've been deterred by the notion of creating a computer presentation for use in court, here's your book. The writing is in plain English and even engaging. The information starts with baby steps but will take you as far as you

care to venture. The insights into how juries view, absorb and evaluate evidence is worth the price of the book, even if you never end up creating a computer presentation. The authors also cover using computer presentations with clients, colleagues and while teaching seminars. Absolutely terrific. 2 of 2 people found the following review helpful. A Great Book for Any Lawyer By Thomas R. French This book is a great tool for any lawyer, but particularly a neophyte to visual persuasion, to learn about how to persuade with PowerPoint and other computer presentation tools. It is a treasure trove of examples to use and to stimulate thinking about how to persuade visually.

This book explains the advantages of computer presentation resources, how to use them effectively in and out of the courtroom.
