Looking forward to when a new up-to-date edition is published.55 of 55 people found the following review helpful. Beware Version Related ProductsBy Lorene Van BurenThis book is easy to read and easy to follow IF you have the version of Timeslips for which it was written. It is, however, specific to Version 7 and the current version in use is 10.1 which is quite different. Version 10.1 is so different from Version 7 that this book is totally useless for the new version.

Hands-on users and those considering purchasing Timeslips Deluxe for Windows, the leading time and billing program, will appreciate the lessons and overviews presented in this book. Three basic lessons - entering timeslips, disbursements, and payment transactions - teach legal professionals the most important features of this software. Chapters on the billing cycle, professional-looking bills, and special fees and retainers touch on the concerns common to all law practice professionals.
