**Bruce Livingston, Stephen Morewitz : The Medical Malpractice Handbook** before purchasing it in order to gage whether or not it would be worth my time, and all praised The Medical Malpractice Handbook:

3 of 3 people found the following review helpful. Was this even written by a lawyer???By Jacob SimmonsI bought this book in preparation for a medical malpractice mock trial at my law school. This book proved worthless to me I can't imagine it being of any value to someone who actually practices in this area. If you are working on med-mal cases and this book added anything to your current knowledge then you are committing malpractice. This is the first

negative review I have given on a product in ten years of shopping on . The book seems to be nothing more than a passing description of various parts of med-mal law. The information could have been cut and pasted from Yahoo answers. Do not buy.0 of 1 people found the following review helpful. Four StarsBy PdxCtDry but informative16 of 17 people found the following review helpful. THE MEDICAL MALPRACTICE HANDBOOK: AN EXCELLENT HANDBOOKBy A CustomerTHE MEDICAL MALPRACTICE HANDBOOK by Bruce Livingston, Physician, J.D., Stephen Morewitz, Ph.D., is an excellent handbook, particularly for those who are unfamiliar with the field. It provides a detailed road map for the investigation, preparation, and disposition of a medical malpractice case.

Designed to assist practicing attorneys in all phases of a medical malpractice case, this practical handbook contains crucial information and strategies for handling a medical malpractice case in such areas as the investigation of the suit, defenses, discovery, use of expert witnesses, settlement discussions, and trial strategies. The study also addresses issues such as the costs of litigation and the role of mediation. Illustrated with case law and citations from different states, this new handbook constitutes a complete guide to medical malpractice that will be of assistance both to lawyers involved in malpractice cases and lay people seeking more information on existing cases and litigations.

About the AuthorBruce Livingston is a physician. Stephen Morewitz is an independent litigation consultant.
