Lynton Keith Caldwell : The National Environmental Policy Act: An Agenda for the Future before purchasing it in order to gage whether or not it would be worth my time, and all praised The National Environmental Policy Act:

An Agenda for the Future:

The National Environmental Policy Act has grown more, not less, important in the decades since its enactment. No one knows more about NEPA than Lynton Caldwell. And no one has a clearer vision of its relevance to our future. Highly recommended." David W. Orr, Oberlin College
What has been achieved since the National Environmental Policy Act was passed in 1969? This book points out where and how NEPA has affected national environmental policy and where and why its intent has been frustrated. The roles of Congress, the President, and the courts in the implementation of NEPA are analyzed. Professor Caldwell also looks at the conflicted state of public opinion regarding the environment and conjectures as to what must be done in order to develop a coherent and sustained policy.

About the Author
Lynton Keith Caldwell is Arthur F. Bentley Professor Emeritus of Political Science and Professor of Public and Environmental Affairs at Indiana University, active in environmental and science policy research. He is noted as one of the principal architects of the National Environment Policy Act of 1969 and an "initiator" of the environmental impact statement. He has published more than 250 articles and monographs and twelve books, including *In Defense of the Earth* (Indiana University Press, 1972).
