BerksAs an experience patent practitioner, I know there is a lot more to producing a good patent than just writing a description and some claims. An understanding of clients needs is often neglected yet is critical. Craige does a great job of tying together all the key factors that go into producing a high quality patent that is going to give the client a commercial advantage over the long term. This book will help me serve my clients better.0 of 0 people found the following review helpful.
