Revealing psychology's enormous potential to promote human welfare through the American system of jurisprudence, former American Psychological Association president Theodore Blau: \* Outlines the ways psychology has come into contact with the court via the areas of neuropsychology, clinical psychology, psychotherapy, mental disability, psychological profiles, various marital and family issues, and others \* Offers a wide range of situations in which psychologists have appeared as expert witnesses \* Includes step-by-step instructions on examining competency to stand trial and making custody recommendations \* Examines cases where psychologists have done well—and not so well—in court \* Discusses malingering, deceit, and exaggeration \* Presents guidelines for testifying in marital, civil, and criminal disputes \* Emphasizes standards for practice and practical training in providing testimony to the courts
