From Brill - Nijhoff : The Rules, Practice, and Jurisprudence of International Courts and Tribunals (International Litigation in Practice) before purchasing it in order to gage whether or not it would be worth my time, and all praised The Rules, Practice, and Jurisprudence of International Courts and Tribunals (International

Litigation in Practice):

International courts and tribunals are key actors in international law, both because of their primary dispute resolution function and for their role in developing international law in a more general sense. Their growing number and complexity makes a detailed study of their practice particularly relevant. *The Rules, Practice, and Jurisprudence of International Courts and Tribunals* examines existing international dispute resolution institutions, including those of general jurisdiction (ICJ, PCA), specialised jurisdiction (ITLOS, ICSID, WTO), as well as human rights courts, international criminal courts and tribunals, courts of regional integration agreements, claims commissions and tribunals, and administrative tribunals of international organizations. Uniquely, it assesses both procedural rules and essential case-law, making it relevant for both academics and practitioners in international law.

About the Author Chiara Giorgetti is an Assistant Professor of Law at Richmond University School of Law. Prior to joining academia, she practiced international law with White Case, LLP in Washington D.C. and Lalive in Geneva.
