Herbert Gottweis, Brian Salter, Cathy Waldby : The The Global Politics of Human Embryonic Stem Cell Science (Health Technology and Society Series) before purchasing it in order to gage whether or not it would be worth my time, and all praised The The Global Politics of Human Embryonic Stem Cell Science (Health Technology

and Society Series):

Drawing on a wide range of interviews and primary and secondary sources, this book investigates the dynamic interactions between national regulatory formation and the global biopolitics of regenerative medicine and human embryonic stem cell science.

About the Author HERBERT GOTTWEIS is Professor at the Department of Political Science and Director of the Life Science Governance Research Platform at the University of Vienna, Austria. His books include *Biobanks: Governance in Comparative Perspective*, (with A Petersen) and *Governing Molecules: The Discursive Politics of Genetic Engineering in Europe and in the United States*. BRIAN SALTER is Professor of Politics and Director of the Global Biopolitics Research Group in the Centre for Biomedicine and Society at King's College London, UK. His books include *The New Politics of Medicine* and *The Politics of Change in the Health Service*. A/PROFESSOR CATHERINE WALDBY is International Research Fellow at the University of Sydney, Australia. She researches social studies of biomedicine and the life sciences. She is a foundational member of the global biopolitics research group, an international consortium of scholars who investigate the effects of cultural, political and economic globalization on the social relations of biomedicine. Her books include (with Robert Mitchell) *Tissue Economies: Blood, Organs and Cell Lines in Late Capitalism*.
