Your Responsibilities.YOU MUST SEE Part Two, chapter III, page 101, " Trust Accounting ". Get a sample, a visual sample of court trust accounting. You need to know and see the format that shows how trust expenses are expected to

be accounted daily though the end of each year for ALL assets. Court accounting is easy enough to do yourself, just be sure to read your fiduciary responsibilities and assets management duties and keep YOUR MONEY SEPERATE from trust/estate funds in everything you do. Don't wait for an attorney to tell you step-by-step how to do this, or provide you what you need to see. They will be way to busy sending you their bills for payment. If an attorney does give you a sample court accounting, find a large bank private client services officer who you can show you an example of a court accounting, for comparison.

This comprehensive guide details the ins and outs of becoming a trustee, the responsibilities it entails, the organization and control it requires, and the full wealth of information you'll need to successfully administer a family or personal trust.

Donald E. Williams, Connecticut Bar Association Director of Professional Development From the Author While Uncle Charlie and Aunt Dot might be the perfect couple to bring up your children in the event of your sudden demise, if their finances are a tangled web and they have no patience with "paper work" it might be unwise to entrust your children's financial future with them. While this book may appear to be directed toward the trustee, it is designed to be instructive to the three parties concerned in this trustee triangle: the settlor who must choose the person(s) who may be suddenly charged with the responsibility for the settlor's child's welfare; the beneficiary, whose financial assets are being managed by someone not his or her parent; and the trustee who accepted the appointment, never believing that he or she would actually have to perform... [Pierre and I] wrote this book without footnotes or citations so that it would be accessible to non-lawyers as well as professionals who are not specialists in the field.
