damaged or killed by a vaccine it stands as a shameful broken promise to our children. Vaccine makers and Doctors were given immunity from prosecution for any vaccine related death/damage in 1986 (National Childhood Vaccine Injury Act), in exchange the government set up the only place families could go for help and support if their children were damaged. You still can't sue drug makers or doctors for their faulty products and conduct AND if you try to get help through the Vaccine Kangaroo Court they will make your life a living hell and 4 out of 5 are turned away to deal with the heavy burden of vaccine induced trauma and the expense and time it takes to manage what was once your beautiful and healthy child. As hard as it is to get help from the court they have awarded damages nearing 3 billion dollars since 1998. According to the above named legislation and the Supreme Court: 'Vaccines are unavoidably unsafe.' Your doctor says they are 'safe and effective'... only for the drug companies and the doctors. Parents do your own research - it is all on you to keep your children safe. 6 of 6 people found the following review helpful. I got this book 2 years ago and devoured it ...By Angie G. I got this book 2 years ago and devoured it in a couple days. It's so packed full of history, references and data that it has become one of my staples on my desk for research and reference in answering questions. It's a must read and tops my list for recommended reading for all classes I teach. 6 of 6 people found the following review helpful. This book is packed with great information on the history of the vaccine compensation program ...By celiac This book is packed with great information on the history of the vaccine compensation program and how exactly it works. I learned startling facts. Highly recommend!

A hard look at the National Vaccine Injury Compensation Program and the families desperately trying to navigate their way through it. The Vaccine Court looks at the mysterious and often unknown world of the National Vaccine Injury Compensation Program (NVICP), the only recourse for seeking compensation for those who have been injured by a vaccine. The NVICP, better known as the Vaccine Court, however, is not without controversy. Established by Congress as a direct result of the passage of the National Childhood Vaccine Injury Act of 1986, the NVICP was supposed to offer a no-fault alternative to the traditional injury claims filed in state or federal courts and was to provide quick, efficient, and fair compensation for those who have been injured by vaccines. The reality, however, is that many cases take several years or longer to complete and require tremendous commitment from families already pushed to the brink of bankruptcy caring for the vaccine-injured family member, only to discover that the end result is manipulated by the government in defense of the US vaccine policy. Mr. Rohde looks into the inner workings of the US Federal Claims Court and the NVICP. He interviews families who have filed petitions and won compensation, families who have been denied compensation, and families still waiting for a decision. By highlighting the journeys of these families their efforts to find attorneys willing to represent them, the filing of their petitions, and the subsequent mountain of paperwork, medical records, and other documents that span years Mr. Rohde exposes the bitter truth behind the NVICP. Through his thoughtful interviews and fact-finding research, The Vaccine Court sheds light on how the NVICP has evolved into something far more treacherous than what Congress envisioned with the National Childhood Vaccine Injury Act in 1986.

Here you have it, in black and white: the unfairness, the corruption and system-wide bias, documented for the world to see. The VICP is in need of complete reform, or it needs to be abolished altogether. This book may well trigger the outcry in the public to start that much-needed process. Injustice cannot be addressed until the spotlight is pointed directly at the problem. And Mr. Rohde has done that brilliantly. He has done a great service in writing this book. The VICP can no longer hide in the dark, protected by silence. People can now know the truth, and that is a huge victory. This is a must-read book. Sylvia Pimentel, vice-president of the California chapter of the National Autism Association, and founder and moderator of Sac-Autism-Biomed Wayne Rohde has lifted the veil over the murky tort reform experiment known as the Vaccine Court. In exposing the programs imbalanced liability protection for powerful vaccine manufacturers, he has performed a valuable public service. Robert J. Krakow, attorney and coauthor of Unanswered Questions from the Vaccine Injury Compensation Program: A of Compensated Cases of Vaccine-Induced Brain Injury Few Americans know about the US 'Vaccine Court,' yet it may be their only recourse if they suffer an adverse vaccine reaction. In this groundbreaking book, Rohde details how the court works, or rather does not work, and the critical problems that bedevil it. Written with compassion and based on extensive research, Rohde's book is a must-read for all those concerned about the intended and unintended consequences of US vaccines. Mary Holland, research scholar, NYU School of Law
