United Nations : Tracking Progress on Child and Maternal Nutrition: A Survival and Development Priority Within Our Reach before purchasing it in order to gage whether or not it would be worth my time, and all praised Tracking Progress on Child and Maternal Nutrition: A Survival and Development Priority Within Our Reach:

This report offers a rationale for urgently scaling up effective interventions to reduce the global burden of child and maternal undernutrition. It provides information on nutrition strategies and progress made by programmes, based on the most recent data available. The success stories and lessons leaned that are described in the publication demonstrate

that reducing undernutrition is entirely feasible. The report presents detailed, up-to-date information on nutritional status, programme implementation and related indicators for the 24 countries where 80 per cent of the worlds stunted children live. While this report is a call to action for these 24 high-burden countries, it also highlights the need for accelerated efforts to reduce undernutrition in all countries.
