From Brill - Nijhoff : Transboundary Governance of Biodiversity (Legal Aspects of Sustainable Development)
before purchasing it in order to gage whether or not it would be worth my time, and all praised Transboundary

Governance of Biodiversity (Legal Aspects of Sustainable Development):

Transboundary Governance of Biodiversity compiles critical analysis of the regulatory frameworks applicable to the transboundary governance of biodiversity by specialists from Europe and Africa. Drawing on their vast experience as lawyers, political scientists and natural resource management experts, they provide a critique and contemporary perspectives on what has become one of the most challenging aspects of global environmental governance in the Anthropocene: effective biodiversity conservation in times of unprecedented environmental crises. With a unique North-South focus and a legal focus infused by multi-disciplinary regulatory dimensions, this peer-reviewed publication offers a comprehensive analysis of international and regional environmental law frameworks applicable to the transboundary governance of biodiversity.

About the Author Prof. Dr. Louis J. Kotze is Visiting Professor of Environmental Law at the University of Lincoln, United Kingdom, and Professor of Environmental Law at the Faculty of Law, North-West University, Potchefstroom, South Africa.
