accountant, attorney or dreamer that wants to know what his Patent is worth. Well done. 0 of 1 people found the following review helpful. A seminal work
By Denise's Reviews
Great overview of claims language and court cases. Discusses a number of valuation models. A must-read for anyone licensing patents, or invalidating prior art. 0 of 1 people found the following review helpful. Three Stars
By D K SHARMA
Good Book in the field of IPR

Book Description
Publication Date: July 2013 | ISBN-10: 0989554104 | ISBN-13: 978-0989554107
TRUE PATENT VALUE answers the questions, What is a high-quality patent?, and What is a valuable patent? Specific patents are shown to be good or bad, resulting in patent sales for millions of dollars, court decisions for hundreds of millions of dollars, or in some cases, complete loss. The book includes three main sections: First, a review of basic patent concepts, and of techniques used by professional evaluators to review and rate patent quality. Second, twenty case studies of more than fifty patents. This section also includes an analysis of the patent portfolios of three high-tech companies, reviewed by quality, by geographic balance, and by balance over time. Each case study or portfolio analysis concludes with a short and pointed list of Lessons Learned. Third, a summary in an easy-to-understand Question Answer format organized by main topic, followed by a Glossary of more than eighty terms used in patent analysis. TRUE PATENT VALUE is intended for four groups of readers: (1) Entrepreneurs and engineers who until now had no way of judging how good their patents are; (2) Patent attorneys and agents looking for a concentration of live cases where specific drafting created (or failed to create) valuable patents; (3) Corporate executives, corporate Board members, and patent brokers, contemplating the purchase or sale of patent portfolios; (4) Investment advisors, equity analysts, and investment bankers working with high-tech companies, who need to understand whether a patent portfolio truly adds value.

About the Author
About the Author
Larry M. Goldstein is a U.S. patent attorney specializing in Information Communication Technologies. He evaluates patent quality, manages patent portfolios, and is engaged actively in the drafting and prosecuting of patent applications. He helped establish the patent pool for 3G W-CDMA technology, specifically in creating the methodology for determining the essentiality of patents to the W-CDMA technical standard, preparing licensing agreements to implement FRAND terms conditions, and obtaining the approval of the Antitrust Division of the United States Department of Justice. He is a co-author of the book Technology Patent Licensing: An International Reference on 21st Century Patent Licensing, Patent Pools and Patent Platforms. He has established patent harvesting programs at several high-tech communication companies, and has been an expert witness in several patent litigations. Mr. Goldstein holds a B.A. from Harvard College, an MBA from the Kellogg School of Management at Northwestern University, and a J.D. from the University of Chicago Law School. His web site is www.truepatentvalue.com.
