A Must Read to Protect Your Family's SecurityBy KidMandeville"Trust Me", by Katherine Steel is a very important and informative read for anyone dealing with aging parents, or ANY family matter involving finances. I just wish it had been available to read before my aunt's caretaker embezzled every cent she had, ran up her credit cards, sold all her valuables and took out a loan on her house, which

was paid off 30 years ago! My aunt is 95 years old and almost blind, and this woman took everything she had and then skipped town! The vultures are definitely out there, and they come in the form of people we think we can trust. I'm honest, so it never occurred to me to question the integrity of a woman who possessed the credentials this woman had. Lawyers, caretakers, neighbors, "friends"- people you want to believe are on your side- people you think are looking after your family- well, read this book and find out how they just might be predators, just waiting for the opportunity to take everything you and your loved ones have! Do it now, so you won't have to regret not knowing, like I do. 0 of 0 people found the following review helpful. Get it and Get it now!!!!By Kathy SmithI don't know where to start in telling you to buy this book and finish reading it in 3 hours.... tops. It is like a crime novel book, mixed in with a humor book, mixed in with drama and EDUCATIONAL book. Where should I begin my review? Y'know how your 8th grade social studies teacher taught you that "In life, as you begin to become an adult, if you don't understand something.... go to the kid's section of the library and find an 8th grade explanation of the topic. You will understand so much better if you read this book about families and greed, families and heartbreak, families and power, families and control, families and power. Well, I am sure you get the idea by now. This book is SMART, FUN, and EDUCATIONAL. Enough said. 0 of 0 people found the following review helpful. Angry WriterBy Jeanne AbramsWow, I can understand this writer's frustration and even her anger about the poor management of the family trust. But this would have better served as a blog. All the sorry stories were just that - sorry stories. There was only a rare tidbit of information on how to actually avoid some of the problems that come up in estate settlements. I hope she gets some closure from getting it all out in the open.

When it comes to your family trust, watch out for the vultures: everyone wants a bite of your assets! Don't expect your attorney or siblings to be honest or fair; more crimes are committed with a pen than with a gun. This is a Brave New World as our generation is just entering the inheritance arena. Mix that with a bad economy, and the situation is ripe for disaster. It is a dog-eat-dog economic climate right now, and everybody is trolling for money. This book will be your road map through these shark-infested waters. It is filled with stories of unscrupulous lawyers, stealing siblings, financial advisors from hell, crooked caretakers....and even the "do-gooder" neighbor waiting in the wings to take your things. Consider this as your don't be an idiot guide.
