Maurizio Lupoi : Trusts: A Comparative Study (Cambridge Studies in International and Comparative Law) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Trusts: A Comparative Study (Cambridge Studies in International and Comparative Law):

This is the first attempt to deal with trusts on a comparative law basis. The book examines more than thirty countries, and submits a unified theory of trusts. The effects of the Hague Convention of 1985 are discussed, as well as its implementation in ratifying civil law countries, where it is now possible to form trusts under a foreign law. Academics will find this book a novel approach to the English-model trust, and practitioners will find it gives a wealth of information on foreign legal systems.
