Currently, the only version still in publication is the EXTREMELY revised and slimmed down 1942 revision (or as I call it, "The Reader's Digest Condensed Version"). I personally think they should put the 1901 version back in print. To give you an idea, the original version is 379 pages, the 1942 version is 300 pages. That's 79 pages cut out! Of those 79, 30 are the daily guides which were removed from the 1942 version, because these were now "fresh every month in Divine Science monthly", later called *Aspire to Better Living*, both no longer in publication. As for the rest of the missing material, there's a very interesting section comparing Divine Science beliefs to those of other denominations, most notably Christian Science, which I found very informative, as well as a section about the first chapter of Genesis ("The Breaking of Light"). There are also other little things in the remaining chapters that were edited down here and there - mostly, references to Fannie James' other book, *Selected Bible Readings*, which is, incidentally, still in print, so I was able to follow all of the references just fine.. But I personally prefer this version to the shortened 1942 version. A wonderful, in-depth exposition on the principles of

Divine Science, one of the oldest still existing New Thought denominations. If you can find it, get this version instead of the current 1942 version.
