**Elisa Morgera, Elsa Tsioumani, Matthias Buck : Unraveling the Nagoya Protocol: A Commentary on the Nagoya Protocol on Access and Benefit-Sharing to the Convention on Biological Diversity (Legal Studies on Access and Benefit-Sharing)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Unraveling the Nagoya Protocol: A Commentary on the Nagoya Protocol on Access and Benefit-Sharing to

the Convention on Biological Diversity (Legal Studies on Access and Benefit-Sharing):

The Nagoya Protocol on access and benefit-sharing is an international environmental agreement that concerns environmental sustainability, other sustainable development issues and equity. It addresses a complex subject matter that affects a range of research, development and commercial activities and is relevant to different areas of international law such as human rights, intellectual property rights, health, food and oceans. Unraveling the Nagoya Protocol identifies textual, contextual and systemic interpretative questions and suggests solutions that aim to give a coherent and balanced meaning to the text of the Protocol. Offering a systematic discussion of the Protocol's legal innovations against the background of general international law, this commentary aims to be of use to international biodiversity law scholars and practitioners, as well as to international lawyers that approach access and benefit-sharing for the first time."

About the Author  
Elisa Morgera (LLM, University College London; PhD, European University Institute) is Senior Lecturer in Global Environmental Law at the University of Edinburgh School of Law. She is the author of *Corporate Accountability in International Environmental Law* (OUP, 2009) and co-author of *Environmental Integration in the EU's External Relations* (Hart, 2012), and has published extensively on international biodiversity law. Elsa Tsioumani (LLM, College of Europe) is a lawyer specializing in international and European environmental law. She is currently an ERC Research Fellow at the University of Edinburgh School of Law. She has consulted for various international organizations, and has published extensively on international biodiversity law and policy. Matthias Buck (Ass. iur, M.A.) works with the European Commission and is currently seconded to the German government, advising on EU aspects of the energy transition project. He was the main EU negotiator of the Nagoya Protocol from 2007 to its adoption. He has published widely on EU and international environmental policy and law.
