**Sandra Rohrstaff : When the Bough Breaks** before purchasing it in order to gage whether or not it would be worth my time, and all praised When the Bough Breaks:

I wrote this book for two reasons: 1. To make parents and caregivers aware of the most common injury accidents involving children so that can take steps to avoid them; and 2. To provide information and resources to parents who find themselves in the awful position of having a child who has been seriously injured due to someone else's

carelessness. Over the past 20+ years, I have tried many accident cases in Virginia. As a mother, the most tragic and heart-wrenching ones have been those involving children. Most of the time, my opponent is a powerful insurance company that is willing to pay for an aggressive and time-consuming defense, even when the injured person is a child. Parents, already coping with sadness and grief, are overwhelmed by an often incomprehensible legal process. A lawyer who is experienced in representing children who have been injured can help. I know firsthand what a parent goes through when the parent's child has been seriously harmed by the negligence of someone else. I hope this book helps parents do what they are already doing—protecting and advancing the best interests of their child.
