This textbook and course reference is designed specifically for Advanced Legal Research classes and for upper-level students who want to achieve a better understanding of how to use the sources of legal information that they learned

about in their introductory courses. it focuses on the types of information the researcher needs, rather than on descriptions of particular information products. The new edition discusses all the newest material available to legal researchers including new sources of information on the internet, new subscription databases, and new interface designs and features from the leading online vendors. The second edition will feature completely updated material, and will include new chapters on municipal law, court rules, and form books.
