Robert D Fish ESQ : White Space Patenting: The Inventors Guide to Great Applications (Patent Shock Series) (Volume 1) before purchasing it in order to gage whether or not it would be worth my time, and all praised White Space Patenting: The Inventors Guide to Great Applications (Patent Shock Series) (Volume 1):

Shows how to draft patent applications using a far superior market orientated approach, rather than an invention-oriented approach. The question is not "what did you invent "but what do you want to stop competitors from doing?"
Written with a conversational style and numerous examples, the book teaches how to write dominating patent applications.
